

Public Schools & Districts by State

How America's school systems are built — the number of schools and districts, and how big they run, in every state. From Hawaii's single district to Texas' 1,200+. NCES, 2023–24.

ABOUT K12 ACADEMICS

The world's largest education resource.

Online since 2004, K12 Academics has helped millions of families, students and educators **find the right school, college, camp, business and program in their community** — across every one of America's ~99,000 public schools.

THE ARCHITECTURE OF EDUCATION

Two states can enroll the same number of students yet run wildly different systems — one with hundreds of tiny districts, another with a handful of huge ones. This volume maps that hidden architecture, state by state.

SEARCH 200+ DIRECTORIES

K-12 Schools · School Districts · Charter Schools · Private Schools · Colleges & Universities

WHAT THIS IS

Same students, different systems.

Every state's page shows how its public system is structured: the number of **schools** and **districts**, the **average school size**, and how many students the typical **district** serves — the difference between a consolidated system and a fragmented one.

ONE NATION, 19,000 DISTRICTS

America runs **99,297** public schools across **19,186** districts — an average of **498** students per school and **2,575** per district. But structure varies enormously: **Hawaii** is a single statewide district; **Maryland** and **Nevada** run county-sized districts; while **California** and **Texas** each have over 1,200.

ON EACH PAGE

- **Schools & districts** — the count of each, operating in 2023–24
- **Average school size** — students per school
- **Average district size** — students per district — the consolidation signal

Source. U.S. Dept of Education, NCES, Common Core of Data, **2023–24** (Public School & LEA Universe Surveys, Final Version 1a). Operating public schools and districts; membership includes Pre-K–grade 13.
